

Constructing a Minor Triad

A Minor Triad is constructed from the 1st, 3rd and 5th notes of the Minor scale. If we analyse the intervals we can see that there is a 1.5 tone gap between 1 and 3 and a 2 tone gap between 3 and 5. This knowledge helps us to quickly and easily build a Minor Triad from any starting note.

C MINOR TRIAD

Now practice this using different minor scales/key signatures/starting notes. Notice how they always sound the same, whatever key/scale/starting note you use.
